

Modular pontoon systems for water access

Airfloat Ltd is a privately owned company which has been successfully selling Modular Pontoon Systems for large or small scale design and construction projects to the Military, commercial & private sectors worldwide.

The system is rotational moulded creating a tough durable product made from MDPE. The modules are 700 x 700 x 440 & lock together with a uniquely designed Pin to form floating platforms. Applications include docks, bridges, walkways & work platforms for temporary or permanent installations, transport barges and emergency relief aid.

A barrier to control the polluted run-off water from the runways at Heathrow for BAA. Airfloat replaced the rotted concrete floats with Airfloat modules. A rubber barrier was then attached to fenders supported by the Airfloat modules.

Temporary jetties were needed in the Scilly Isles to accommodate the 40 tonne ferries; a testament to the strength of Airfloat, taking up to 2 metre waves & force 10 storms, as shown on our website.

The Sto-Away POWER Crane YOUR PREMIUM CHOICE IN BUMPER CRANES

Versatile, dependable and with your safety in mind, always there when you need that extra hand! Let your next investment be a Sto-Away POWER Crane.

For the last 26 years Sto-Away Power Cranes have been turning Pickups, Vans & Utility Trucks into real work vehicles capable of moving 3,000lb loads with a single push of a button. Simple to install, one person can effortlessly unfold a crane from the step bumper in less than 10 seconds.

An effective way to control labour costs & a Health & Safety solution to moving heavy loads, an efficient & safe way to get the job done!

No project is too tough for Sto-Away!

Standard Features:

- Emergency stop button with water proof non-corroding plug-manual reset circuit. On/off toggle switch with indicator light.
- Removable Hand Pendant. Tow Hitch.
- 12 setting fold down outrigger leg.
- Complete mounting hardware included, completely wired & tested.
- Aircraft quality pulley pins & locking keepers.
- Sto-Away 3 year limited warranty.

Widely used by the US Coast Guard & Federal Government.

Water & Sewer Departments use Sto-Away for confined space/rescue, and also to lift their pumps out of wet well stations. Sto-Away can customize units for CCTV inspection trucks, vans and off-road vehicles too.

Moving masonry/memorial work, hazardous materials, disaster cleanup, parks & highway departments, landscaping, golf courses, delivery companies, disabled mobility.
