

## Protector cases, Remote Area Lighting Systems and Peli torches to Search & Rescue organisations

Peli Products (UK) Ltd are accredited to ISO9001:2008 and are the UK distributors of the watertight, crushproof and dustproof Peli Protector Case range.

With Stanag/Defstan certification and NATO Stock codes, Peli cases are available in over 40 sizes. They are used throughout the world for the safe transportation of all types of equipment including metering devices, scopes, communications and IT equipment and photographic gear.

Manufactured from an incredibly light structural resin shell that does not dent, Peli cases feature pick n pluck foam or padded dividers to protect the contents from rough handling.

Larger Peli cases are designed for mass transit, making them ideal for a wide variety of applications. The design includes options for fork lift and features enabling manual handling.

Peli cases rugged dependability makes them ideal for the most challenging and hostile conditions throughout the world.

Peli's **Remote Area Lighting systems** offer portable, powerful LED lighting for operations where no power supply is available. These rechargeable products are fully operational in seconds, for rapid deployment. They offer up to 15 hours of area light and fully recharge in approx 6 hours.

The **9430** model is a compact unit weighing less than 10kg but with a powerful 2000 lumen output (high mode). The retractable mast extends to almost 1 metre in height and can be rotated 360°, the head also pivots to angle the light directly where required. Ideal for illuminating RTAs, confined space rescue and extrication, the 9430 has wide ranging applications throughout the emergency services.

The larger RALS units combine Peli's innovative lighting technology and the rugged dependability of Peli cases. These self contained systems are housed within a wheeled Peli Protector Case which is easy to manoeuvre and transport and protects from the weather. The **9450**, **9460** and **9470** models offer a choice of up to four heads to illuminate the required area.

Also available is a Tripod with Extension Cord that takes the versatility of the Remote Area Lighting Systems to new heights, allowing a wider area to be illuminated.

**New for 2010** - Peli Shelter Lighting comprises 3 independently switched light heads, designed to illuminate a temporary shelter.
