

Statement of Capability

Who are We

The Infrastructure Response Equipment Group (**InfREG**) is a co-operative group of UK-based Small and Medium Sized Enterprises with expertise in highly specialised products and equipment that can be used in expeditionary projects and humanitarian aid response programmes.

Our Beginnings

The Infrastructure Response Equipment Group has its beginnings in an event in 2009 organised by the Small Business Unit of UKTI Defence & Security Organisation – Expeditionary Humanitarian Operations Infrastructure Showcase Event. Held at Gibraltar Barracks in southern England, the programme brought together companies capable of providing a wide range of high quality yet affordable expeditionary kit. Following that initiative a number of the participating companies came together, and in early 2010, **InfREG** – the **I**nfra**s**tructure **R**esponse **E**quipment **G**roup -was formed,

Operating Categories

Power (Generators and Battery Systems),	Shelters, protective and functional,
Communications,	Lighting & Air Conditioning
Pontoons & Barriers,	Medical Equipment & Supplies,
Water Purification,	Specialist Vehicles,
Security, Perimeter Protection,	Portable Trackway & Bases,

Strength of One

As members we are constantly interacting and looking for new ways to maximise our potential and utilise each others products to ensure that customer needs are satisfied. The individual companies are able to react and adapt quickly to change, keeping up with technology and customer requirements. Collectively the companies come together to provide total flexible solutions that harness skills to meet individual customer requirements without compromise. Once the requirement has been clearly identified then the key team members are selected. Those members then work through one prime contractor within their group to ensure maximum convenience for the customer, no matter how complex that contract is. This arrangement is important for the customer providing one single point of contact and one single contract.

Executive Structure

Chairman & Hon. Sec. : David Claxton : DMS technologies

Treasurer : Laura Lee : Medical Warehouse

Events : John Whaites : Unishelter

Publicity/Website : Paul Kitchen : Peli Products

Humanitarian & Aid Response Activities

Our members have been heavily involved in response to natural disasters across the world including Haiti, Pakistan and Japan, as well as responding to urgent requests for medical aid in war-torn Libya.

Activities and Events

As InfREG, we have exhibited our capabilities at both the DVD 2010 show at Millbrook and the Emergency Services Show 2010 at Stoneleigh in November. Our next event will be Aidex, Brussels in October later this year

Members & their Capabilities

Airfloat	Deployable pontoons, bridges, walkways and barriers.
Badnams	Lightweight , ultra-quiet generators up to 2kVA output
DMS technologies	Battery-based power systems, portable and vehicle mounted.
FAUN Trackway	Portable roadways, temporary airfield and landing pads
FHS	Fuel handling systems for remote and challenging locations.
Hawklok	Palletised flooring systems
Harrington Generators	Both diesel and petroleum power generators from 2.6kVA to 30kW output.
Hesco Bastion	Semi-permanent & rapidly built shelter solutions using readily available material.
Lifesaver Systems	LIFESAVER Bottle and Jerrycan systems provides clean drinking
Medical Warehouse	Medical equipment, devices, furniture and consumables.
Peli Products	Rugged cases, remote area and shelter lighting.
Servicom	Integrated radio communications systems
Sleepbreeze	Shelter and individual air conditioning.
Team Leyland	Specialist vehicle design and manufacture & specialist logistics services.
UAVSI	Aerial information assessment system
Unishelter	Speedily deployable transitional, pre-fabricated semi-permanent shelter systems
Zigma Ground Solutions	Lightweight, durable deployable trackway, ground protection and temporary access.

As examples:

FIELD HOSPITAL - DEPLOYABLE WITHIN 72 HOURS

Field hospital provided with following utilities & services:

Air conditioning and heating system
Toilet sections (WC - Plus Showers)
Oxygen generator [piped]
Water treatment unit
Emergency Lighting
Insulating floor
Internal insulating carpets
Electrical distribution box
Lighting kits
Tables, cabinets and chairs
Cables and electrical extensions
Sun shield external cover

PROTECTED ACCOMMODATION BASE

External protective wall (Hesco Bastion)
Family living shelters (20 people) – own generator.
Kitchen incl. clean water
Dining area
Day room
Office & Administration
Treatment Room
Storage facilities
Communications centre
Food storage
Fuel
Potable water supply
Area lighting
